

QuickStart

Overview

The objective of the **QuickStart Advisory Services Program** is to help clients be as successful as possible with Couchbase as quickly as possible. Our consultants (Couchbase experts) will supplement the client's team by providing best-practice advice on topics including those described below:

- Application Requirements
- Setting up a meaningful evaluation of Couchbase
- Installing and configuring Couchbase
- Developing an application using Couchbase
- Tuning and optimizing Couchbase for an application
- Devising & implementing performance measurement strategies
- Troubleshooting techniques
- Deploying an application into production
- Couchbase monitoring and alerts.

Engagement Approach

This program is provided on-site as a **two-day engagement**.

The typical approach for an Architecture Review engagement is as follows:

- An initial meeting is held remotely to understand the client's application and discuss the desired focus of the engagement.
- Couchbase will request pre-requisites based on the focus of the engagement, including architecture diagrams and configurations to prepare for the on-site engagement.
- On-site engagement dates are planned and logistics are discussed with clients.
- On-site engagement follows. All discussions here will be confidential and information is collected only to help with architecture, data design, and sizing recommendations.

Time and Duration: This engagement provides up to a total of **2 days of Couchbase consultant time on-site**. An additional 10 hours of remote time is included for deliverable creation and review.

Expenses: Reasonable travel and expenses incurred in conducting on-site activities at the client's site shall be billable to and paid by the client upon receiving invoice with expense report and receipts.
